

Professional Summary

Computer Science Engineering undergraduate with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Software Engineering. Experienced in developing scalable full-stack applications using Java, Python, React.js, Flask, REST APIs, and SQL. Skilled in designing modular software solutions, API development, debugging, and implementing efficient production-ready applications using modern development practices.

Education

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.59

Sep 2023 – May 2027

Technical Skills

- **Programming Languages:** C++, Java, Python, JavaScript, SQL
- **Web Development:** React.js, Flask, REST APIs, HTML, CSS, Axios
- **Core Computer Science:** Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Developer Tools:** Git, GitHub, Postman, VS Code
- **Libraries:** NumPy, Pandas, OpenCV, Scikit-learn

Projects

AI Gesture Recognition System for Emergency Assistance

Jun 2025 – Apr 2026

Python, OpenCV, Flask, CNN, YOLOv10

- Developed a real-time software application for emergency gesture recognition using computer vision techniques.
- Designed modular image processing and prediction pipelines supporting efficient real-time inference.
- Implemented scalable application architecture with optimized performance and reusable components.

Full Stack Healthcare Prediction Platform

May 2026

React.js, Flask, REST APIs, Python

- Designed and developed a full-stack healthcare application using React.js frontend and Flask backend.
- Built RESTful APIs for communication between frontend services and prediction modules.
- Implemented modular client-server architecture with API integration and cloud deployment.
- Deployed application using Vercel and Render platforms for real-world accessibility.

Blood Group Detection using Fingerprint Analysis

Sep 2024 – Jan 2025

Python, Streamlit, Scikit-learn

- Developed an image-based prediction application with preprocessing and machine learning pipelines.
- Built interactive Streamlit interface enabling real-time user interaction and predictions.
- Published research findings based on the developed software solution in IEEE Xplore.

Experience

Research Project Lead

Sep 2024 – Jan 2025

Blood Group Detection using Fingerprint Analysis

VIT Bhopal

- Led end-to-end software development including requirement analysis, implementation, testing, and deployment.
- Developed data processing workflows, integrated ML components, and improved application reliability through validation.
- Collaborated on designing maintainable and scalable software architecture.

Certifications

- **Microsoft Elevate Internship (AICTE)** – Azure Fundamentals and Cloud Technologies
- **Applied Machine Learning in Python** – Coursera
